

## Magpie Game:

@colmnally

End line to 45M line, two goals on the end line making two separate pitches, try to make them 30M wide if possible. Keeper 😊 in each, attackers 😊 line up in the centre of one pitch and defenders 😡 line up in the centre of the other, each player has a ball as displayed. On the signal the first attacker 😊 runs towards the goal he's facing and tries to score a goal, once he takes his shot the defender in the opposite pitch runs towards his goal, after shooting the attacker now runs across into the defenders pitch and tries to steel the ball or prevent the defender from scoring creating a 1 v 1, once the defender attempts a shot the next attacker leaves and the shooting defender now moves across and tries to steel the ball and stop him scoring. Each player becomes a defender in the opposite pitch after shooting, game continues on this loop with the players swapping sides for their re starts.

**Progression:** Each player tries to score a point making the defending player press higher.

**Aims:** Opposed shooting, defenders try to steel the ball rather than just stop attacker.
