

Even numbers of players on each side of the pitch as displayed. Adjust pitch size to suit but always have pitch wider than longer, for a 10 😊 v 10 😞 make the pitch 50M X 40M. Each team must try and get across the halfway line and rob a ball from the opposition end line without been touched, if they are successful they can walk or run back to their side of the pitch with the ball and add to their own, if they are touched while trying to rob a ball they must go to jail. As players end up in jail the free players now have a choice, if they secure a ball they can free a man instead of taking the ball back to their side. The first team to have all the balls wins the game.

**Progression:** After a couple of games allow each team time to discuss strategies and tactics.

**Aims:** Loads of learnings for young players about creating space, making decoy runs, spotting gaps, guarding areas.
